Work Experience

Full Stack Developer – Dabbal Software Development PLC   Feb 2024 –Sep 2024

- Led the development of the Blog-Post web application, a platform designed for content creation, user engagement, and community building.
- Implemented core functionalities including user registration, secure authentication, and session management.

- Designed and developed content management features, enabling users to create, edit, delete, and categorize blog posts, with support for multimedia uploads.

Backend Developer – Marvels Creative Technology   Feb 2025 – Present

- Contributed to the Marvel Job Portal Project, focusing on backend development to support robust and scalable web functionalities.
- Designed and optimized relational database schemas to support dynamic content and user data.
- Implemented secure user authentication and authorization features.

Projects

Online Donation Platform - https://donate-link.netlify.app/

- **Secure Payment Integration** – Enabled monetary donations through chappa with real-time transaction updates.
- Multilanguage Support – Implemented multilingual functionality to reach a broader and more diverse audience.
- **Material Donations** – Enabled users to track in-kind donations by allowing users to list and track in-kind contributions (e.g., clothes, food).

Dabbal Tech Gazette

- **Blog Management System** – Enabled creation, editing, and publishing of technical articles by staff and contributors
- **Content Categorization** – Organized blog content by tags and categories for easy navigation and discovery.
- **Like & Reaction System** – Users could react to posts with likes, increasing engagement metrics.

Marvel Job Portal

- **Job Posting & Management** – Employers can create, update, and delete job listings with filtering by category and location.
- **Job Application System** – Job seekers can apply to jobs with uploaded CVs and personalized messages.
- **Advanced Search & Filters** – Users can search jobs based on keywords, location, category, and job type.
